

# TAPE CONVERSION CHART: JULY 2011

## FLEXIBLE NYLON

Curved or flat surfaces

wires | patch panels | machinery | equipment | bins

Especially useful for **wire and cable wraps**, flexible nylon labels are **memory-resistant**– so they **wrap easily** around curved surfaces (including wire and cable). Best of all, these adhesives **stick even where dirt and oil** pose threats.

## PERMANENT POLYESTER

Flat surfaces

equipment | bins | patch panels

With a **shinier finish** than flexible nylon, these Permanent Polyester tapes are a **more sophisticated look** that's ideally suited for flat surfaces: name-and-rating plates, patch panels, cabinets, shelves, bins, equipment and more.

## VINYL

All surfaces- Ideal for outdoor applications

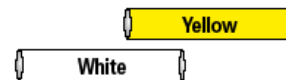

warning messages | wires | patch panels | equipment | machinery

Easy to apply with maximum durability, these can be used in direct sunlight– and are ideal for **outdoor surfaces**.

## HEAT SHRINK TUBE

Wire and cable

Specifically designed for any application requiring normal heat shrink tubing, these **industrial-grade polyolefin labels** help you eliminate one labelling step – by **printing directly on the tubing**. These advanced labels feature a **3:1 heat-shrink ratio**. The label cassette fits any 3M labelling machine.

## SELF-LAMINATING

Wire and cable

**Self-laminating labels** protect your printed area from exposure to oil, solvents, water and abrasion. Specially formulated to stick and last on wire and cable.
