

## Cable Pulling Equipment

**SURESET**

### Magnetic Probe "Cable Grabber"

| Code | Description   | Pack Qty |
|------|---|----------|
| CG1  | 500mm Magnet Probe with 300m Chain + 6m String Line | 1        |

A magnetic tip is secured to the end of the flexible probe which is inserted into the pre drilled hole. Fasten the cable to the end of the string, lower the chain down the cavity and the powerful magnet will grab on - gently remove the probe from the hole and the cable follows. Comes with handy cotton bag for storage.
